INTRODUCTORY NOTE

This handbook is the fourth edition of a book first published in 1970 by the Department of Business and Economic Development as a general reference for use by those interested in business or industrial planning and investment in areas of the State of Illinois.

In this edition, the regions demarcated for the purpose of regional data presentation are the same as those used in the previous edition, and are based on a 1971 Executive Order toward an official regional framework for State planning and administration (see map on page 7). These regions are now under review for possible revision before 1974.

The tables in this 1973 edition represent the most recent and suitable data available. Some revisions of historical series (shown in earlier editions) have been made due to the availability of improved data, and some new material has been added.

The material in the book is presented in two parts, the first of which includes statistical information pertaining to the economy of the entire State (with some regional comparisons). The second part presents regional economic data separately for each of the eleven regions established for the purposes of the book.

In the tables shown in the book, details may not add to totals due to rounding. In the columns of the tables, hyphens represent zero (unless otherwise indicated), NA indicates data not available or not applicable, and (D) indicates data withheld to avoid disclosure of the operations of individual firms.

STATEWIDE SUMMARY

The Department of Business and Economic Development now estimates Gross State Product on both an annual and quarterly basis, and the annual estimates are herein presented for recent years through 1973. The method used in making the estimates rests on the development by the U. S. Department of Commerce of estimates of Gross National Product by industry, and the application of comparative U. S. and State nonfarm earnings data published by Commerce, along with farm income data for the State published by the U. S. Department of Agriculture.

In addition to the Gross Product tables, tables showing Total Personal Income for the State, with regional comparisons, are presented. Total Personal Income is the current income (for the year given) of persons in the State from all sources. It is measured before deductions of income and other personal taxes, but after deduction of personal contributions to Social Security, government retirement, and other social insurance programs. It includes income received from business, Federal and State and local governments, households and institutions, and foreign countries. It consists of wages and salaries (in cash and in kind and including tips and bonuses as well as contractual compensations), various types of supplementary earnings termed "other" labor income (the largest item being employer contributions to private pensions and welfare funds), and the net incomes of owners of unincorporated businesses (farm and nonfarm), including the incomes of independent professionals, net rental income, dividends, interest, and government and business transfer payments (consisting in general of disbursements to persons for which no services are rendered currently, such as unemployment benefits, Social Security payments, and welfare and relief payments).

Following the Gross Product and Personal Income tables in the Statewide section, materials are presented relating to the State's manufacturing sector and pattern of trade in manufactures, agricultural and mineral production, the transportation network, employment and wages, population, and state and local taxes related to personal income.

REGIONAL DATA

As in earlier editions, graphs are presented in this book to generally depict trends in selected components of the economic base of each region. The purpose of these graphs is to provide a compact view of the foundations of the regional economies. Data used for preparation of the graphs derives from the Total Personal Income tables which follow, but they have been adjusted in the graphs to reflect "constant dollar" values. Regarding the graphs, it should be noted that the selected components are not entirely discrete with respect to their designation as parts of the economic base (due to the structure of the Total Personal Income accounts). For example, Government Earnings include local government wages and salaries, a large part of which derives from local taxes and are not "basic" or "export" income for the region. Secondly, some sources of income which contribute to some degree to the economic base are not shown in the graphs because of difficulty in estimating their "basic" portions. In the Chicago Region, for example, a substantial part of Property Income and Earnings from Finance and Retail Trade is probably "basic" to the area, but no effort has been made to include this part as a component in the graph for that Region. It should also be noted that the income data represented in the graphs are based mainly on "place of business" rather than "place of residence," thus portions of the income may be supporting economic activity (consumer spending) outside the region.

Following the regional income tables are materials related to regional population, employment and wages, manufacturing, water supply and agricultural and mineral production, and data for individual communities on transportation facilities and services, housing permits and municipal finance.

In the transportation tables, abbreviations are used to designate airlines and railroads. The keys to the abbreviations are as follows:

Airlines

- AA American Airlines
- AAA Allegheny Airlines
- AC Air Canada
- AF Air France
- AI Air Illinois
- AJ Air Jamaica
- ALIT Alitalia Airlines
- AW Air Wisconsin
- BIA Braniff International Airways
- BOAC British Overseas Airways Corp.
- BR Brower Flight Service
- CAL Continental Airlines
- CMA Mexicana de Aviacion
- DAL Delta Air Lines
- EAL Eastern Air Lines
- ENL Centralia Airlines
- FT Flying Tiger Airlines
- IRA Irish International Air Lines
- KLM KLM Royal Dutch Airlines
- LUF Lufthansa German Airlines
- MA Midwest Airlines
- MAC Midstate Air Commuter
- NCA North Central Airlines
- NWA Northwest Airlines
- OLY Olympic Airways
- OZA Ozark Air Lines
- PAA Pan American World Airways
- PAI Piedmont Airlines
- SAS Scandinavian Airlines System
- SOU Southern Airways
- SWI Swissair
- TWA Trans World Airlines
- UAL United Air Lines
- XV Mississippi Valley Airlines

Railroads

^{*}The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

^{*}The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

^{*}The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

^{*}The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

^{*}The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

^{*}The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

^{*}The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

^{*}The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.

^{*}The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-industry were included in the tabulation in a broader kind-of-industry.
